SUMMARY

Senior DevOps Engineer with 10 years of experience in automation, infrastructure as code, and cloud-native platforms. Kubernetes and Terraform specialist, CI/CD, observability, and reliable operations in high-availability environments. Previous experience as Network Administrator with solid foundation in routing, switching, DNS, firewall, and corporate infrastructure troubleshooting.

SKILLS

Kubernetes | Terraform | Docker | Helm | Argo CD | Jenkins | GitLab CI | GitHub Actions | AWS | Azure | Linux | Python | Bash | Prometheus | Grafana | ELK | Vault | Networking

CERTIFICATIONS

CKA, CKAD, HashiCorp Terraform Associate, AWS Certified DevOps Engineer – Professional, Azure Administrator Associate.

EDUCATION

Bachelor's Degree in Computer Science
University XYZ • 2014

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer 2021 – Present
Global Tech Company • Hybrid

- Designed and operated Kubernetes clusters for critical workloads, improving availability and scalability.
- Standardized infrastructure with Terraform, reducing environment drift and accelerating provisioning.
- Implemented CI/CD pipelines with automated validation, testing, and progressive deployment.
- Structured observability with metrics, logs, and alerts to reduce incident response time.
- Mentored development and operations teams on DevOps and GitOps practices.

DevOps Engineer 2018 – 2021
Digital Solutions Company

- Automated environment provisioning with Terraform, Ansible, and Bash/Python scripts.
- Administered container orchestration and service migration to Kubernetes.
- Optimized continuous delivery pipelines, reducing deployment time and operational failures.
- Standardized secrets, permissions, and access policies across multi-team environments.

Network Administrator 2016 – 2018
InfraNet IT Services

- Managed corporate networks, VLANs, VPNs, firewalls, and load balancing.
- Provided support for connectivity incidents, DNS, DHCP, and routing issues.
- Documented topology, policies, and operational procedures for service continuity.
- Collaborated with server and security teams on infrastructure modernization projects.

KEY PROJECTS

- Kubernetes platform deployment with auto-scaling, ingress, observability, and GitOps.
- Creation of reusable Terraform modules for networks, compute, databases, and cloud security.
- Migration of legacy applications to containerized architecture focused on resilience.
